

FLEXIBATT PRO

A professional portable power system designed to deliver 230 V power. Built for demanding off-grid operations, it provides stable energy for tools, technical equipment, and mission-critical systems in professional, emergency, and field environments.

ABOUT

Flexibatt PRO is ideal for powering tools, charging equipment, and running Euroheater. Its versatile output options, including 230V outlets, USB-C ports, USB outputs, and a Neutrik connection, ensure compatibility with a wide range of equipment.

The system supports both grid charging and solar input, allowing flexible energy supply wherever you operate.

Its modular battery design allows quick battery replacement to keep operations running without interruption, making it a practical and efficient power solution for professionals who depend on continuous energy in the field.

Item No. NOR0004

Battery voltage	48 V nom.	IP rating	IP54
Capacity	2.5 kWh (2.4 kWh nom.)	Weight	26.5 kg
Built-in charger	10A (480W)	Dimensions (W x L x H)	557 x 429 x 216 mm
Output 230V 12V USB	2500 W 240W (max) 2x100 (max)	Ambient operating temperature Discharge Charging Storage	-20 to +55°C +5 to +40°C -20 to +55°C
