

WIND-UP CRANK TRIPOD

The professional WIND UP CRANK TRIPOD is suitable for mobile and stationary use. Unevenness in the floor can be easily compensated for with the length adjustment in one of the three feet.

The pawl integrated in the crankcase prevents the load from being lowered unintentionally and uncontrolled. Both the cables used and the steel tubes are generously dimensioned.

TECHNICAL DATA

General Data	WIND-UP CRANK TRIPOD
Max. payload	50 kg
L x W x H (packing dimensions)	260 x 185 x 1,950 mm
Height max.	3.8 m
